

Company Overview

Lightwave Security is a CI/SO Services company whose vast technical and practical experience provides your organization a foundation of assurance in managing your technology risk.

As a subcontractor for government prime contract holders, Lightwave Security is able to provide the highest level of security expertise while maintaining cutting edge knowledge in the security space though its sole focus on information security.

By employing a progressive and comprehensive approach to the management of risk at an enterprise level, Lightwave utilizes a risk-based approach, experienced professionals, comprehensive methodologies, and the most advanced technical resources available. Lightwave's services combine the professional competency and experience of our seasoned staff in the areas of financial reporting, risk management, and compliance.

With vast experience in government organizations ranging from the Center for Disease Control and Prevention to NASA, we have associate relationships with nearly every skill-set required to certify, deploy, maintain, and support your IT application or program. Our professionals possess an average of 12 years experience in a wide array of government programs including quality assurance, applications testing, process improvement at the program level, compliance assessments and IT security audits.
